**PhoneBase Research, Inc. expands multilingual services to include translations.**

**Fort Collins, Colorado, 08/04/2009** - PBR has added translation services to its list of capabilities, either as an integrated part of a multilingual project, or as a standalone service.

By creating a team of specialized translation agents, PBR has taken steps to ensure they can provide a broader scope of services to their customers. With over 10 years of experience in linguistics, this translations team is skilled in many prevalent languages, including English, Spanish, German, French and Portuguese.

"We've adopted an interactive approach that combines in-depth research and client dialogue, allowing us to capture precise language contexts. Our quick and efficient staff can turn a translation project around in 24 hours. And best of all, we deliver all of this value at very competitive prices!" - Chauncy Bjork

Mr. Bjork, the General Manager of PhoneBase Research, Inc., went on to explain that the decision to offer translation services was based on PBR's own experience finding a provider. After analyzing the market, we found inconsistent pricing, quality and wait times ranging from days to weeks for a finalized translated questionnaire. Armed with our findings, we set out to develop a solution that would ensure timeliness and quality expectations were met, while streamlining costs to benefit our clients. We're excited to be able to offer this top shelf service to our customer base.
